

John Alfred Nathanael Chee

johnanchee@gmail.com | (262) 674-7476 | Portland, Oregon

INTERESTS

Understanding abstractions, applying them in practice. Writing simple and robust code.

EXPERIENCE

Recent Pursuits (Redwood City, California)

Pre-medical student, August 2017 – August 2023

- ▶ Pursued a medical career path by completing pre-medical coursework at Cañada College and UC Berkeley (2017-2019), gaining hands-on experience through patient coaching at RealOptions Obria Medical Clinics (2019-2021), and actively applying to various medical education programs.
- ▶ Pivoted back into technology, recognizing my passion and strengths in the sector.

Snowflake (San Mateo, California)

Software Engineer, April 2016 – August 2017

- ▶ Working with the Automation & Tools team at Snowflake I initiated adoption of reproducible, versionable, code reviewable Jenkins job descriptions with the Job DSL plugin.
- ▶ Conducted the automated build and test of the main Snowflake products: database, user interface, and database drivers for both Windows and Unix-like operating systems.
- ▶ Secured & isolated Jenkins using its off the shelf LDAP security integration and an in-house Vault-inspired authentication tool.
- ▶ Managed & advised OSS teams transitioning from Subversion & Jenkins to Github & Travis CI.
- ▶ Left Snowflake to pursue medical career path.

Twitter (San Francisco, California)

Software Engineer, January 2013 – March 2016

- ▶ Implemented version control related features in Pants, Twitter's monolithic repository build system during my time with Developer Productivity.
- ▶ Contributed to TSAR, an Apache Spark-like, Time Series AggregatoR, and its dependent probabilistic data structures project, Algebird during my time with Platform Intelligence.
- ▶ Co-architected a data warehouse to store per service CPU and RAM usage, and user and service identification enabling chargeback. I also built its elegantly simple ETL system.

MyLife (Mountain View, California)

Software Engineer, May 2010 – January 2013

- ▶ Improved publication turnaround from monthly to 10 minutes of our primary data product.
- ▶ Implemented a JSON-sensitive diff to immensely simplify data quality checking.
- ▶ Combined QuickCheck and sieve to characterize whole system performance.

EDUCATION

Portland State University, Portland, Oregon

M.S. in Computer Science; Advisor: Bart Massey, GPA: 3.78, June 2009

B.S. in Computer Science; Minor: Mathematics, *Cum Laude*, March 2008

SKILLS

Languages – Haskell, bash, SQL, Python

Tools – vim, git, linux

Last updated: November 6, 2025
